PROFESSIONAL SUMMARY

Technology entrepreneur and web professional with hands-on experience in web hosting operations, Linux VPS and server administration, cPanel/WHM, WHMCS, Cloudflare, website development, technical support, and digital content creation. Founder/CEO of HostCreed and YouTube tech content creator, with practical experience managing hosting infrastructure, troubleshooting websites and servers, supporting customers, creating technical tutorials, and developing web-based business solutions. Combines technical problem-solving, business operations, customer service, and technology education.

CORE COMPETENCIES

Web Hosting Operations • Linux VPS Administration • cPanel & WHM • WHMCS • Cloudflare • DNS Management • SSL/TLS • Email Deliverability • Server Troubleshooting • Website Migration & Backup • Web Development • PHP & Laravel Environments • MySQL/MariaDB • WordPress • Technical Support • Digital Marketing • YouTube Content Creation • AI-Assisted Development • Business Operations

PROFESSIONAL EXPERIENCE

Founder & Chief Executive Officer - HostCreed | *From 2024 till date*

- Lead the operations and development of a web hosting business providing hosting and VPS-related services.
- Manage hosting infrastructure and day-to-day technical operations involving Linux VPS environments, cPanel/WHM, WHMCS, DNS, SSL, email, backups, migrations, and customer hosting accounts.
- Troubleshoot server and website issues including DNS failures, Cloudflare errors, database problems, PHP configuration issues, SSL issuance, email authentication, and hosting account restoration.
- Coordinate customer support and operational workflows while overseeing service quality, hosting plans, promotions, and customer communication.
- Work with infrastructure and hosting providers and manage server deployment, migration, security, and service continuity.

Technology Educator & Content Creator - ErnestChuks Tech | *From 2022 till date*

- Create practical technology tutorials covering web development, cPanel, WordPress, VPS hosting, Linux, AI tools, website administration, and everyday internet tasks.
- Develop educational video concepts, demonstrations, thumbnails, titles, descriptions, and SEO-focused content for online audiences.
- Translate technical processes into beginner-friendly explanations and step-by-step tutorials.
- Research and test software, hosting tools, AI platforms, and internet technologies for instructional content.

Web Developer & Digital Solutions Professional - Independent / Freelance | *2021 till date*

- Build, configure, customize, and troubleshoot websites and web applications for business and online use cases.
- Work with PHP-based scripts, Laravel applications, WordPress, MySQL databases, hosting environments, payment integrations, and cPanel deployments.
- Develop and plan digital products including e-commerce platforms, logistics/courier systems, email dispatching platforms, source-code marketplaces, and business websites.
- Provide technical guidance on website deployment, domain configuration, DNS, SSL, databases, backups, migrations, and hosting.

SELECTED PROJECTS & ENTREPRENEURSHIP

- HostCreed - Web hosting business with shared hosting, VPS-related services, WHMCS billing, and customer support operations.
- ErnestChuks Tech - Technology education brand focused on web development, hosting, AI tools, cPanel, WordPress, internet tips, and technical tutorials.
- Revolve Courier - Planned/developed courier logistics solution featuring shipment tracking, notifications, route mapping, administrative tools, and shipment receipts.
- Digital Commerce Solutions - Planned and developed concepts for e-commerce platforms selling source codes, website scripts, templates, themes, plugins, and other digital products.
- MailCreed Email Dispatching Platform - Product concept incorporating user/admin dashboards and monetized service plans.
